

US 2/Belknap Street Viaduct **Detour** *In Superior*

 Detour Route  Truck Detour Route

Beginning in early April, the US 2/ Belknap Street Viaduct above the railroad tracks will be receiving \$1.2 million in necessary improvements. The aging bridge deck will be resurfaced and a left turn lane will be added for motorists coming off of the viaduct onto Banks Avenue.

More than 17,000 vehicles use this structure on a daily basis. During the project, passenger vehicle traffic will be detoured using Garfield Avenue, North 21st Street, and WIS 35/Tower Avenue to get back to Belknap Street.

Truck traffic will be detoured using Susquehanna Avenue north of Belknap Street, Winter Street, and WIS 35/Tower Avenue.

The detour routes were selected to minimize driver inconvenience and allow motorists a safe and efficient means to continue to frequent the businesses along Belknap Street throughout the construction of this important project.

Construction is scheduled to begin the week of April 2, 2006 and continue through mid-July.
